

Dear FCC, I find great benefit in XM Satellite Radio. Especially in the news, weather and traffic info channels. Having a channel dedicated to major cities traffic has helped numerous times when I was stuck on the road and unsure why or where to go and where not to go. I did also attempt to find such information on my regular AM and FM radio and the information I needed I was either not available or inaccurate.

Please back off XM Satellite radio, there is nothing unjust about their offerings.

Sincerely,

Sandy Blumberg
